## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of group I, claims 1-10, in Paper No. 8 is acknowledged.
2. Claims 11-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claims, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

### *Claim Rejections - 35 USC § 101*

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed toward a processor for correcting image data of lightness, saturation and hue. For instance, the processor having means for correcting a value of lightness, determining maximum values of saturation for the values of the lightness before and after the correction of the lightness, correcting a value of saturation in accordance with the maximum values of the determined saturation. This is considered to be non-functional descriptive material, a data structure per sec, mere data since all of the means in the claims are fore generating mere data or different forms of non-functional descriptive material and mathematical calculations.
